OpenTAS **GO** IDT

The Terminal Management Solution
for Inland Distribution Terminals

GO for an easy-to-buy solution to solve complex problems.

OpenTAS GO

derives from the best Terminal Management solution on the market (OpenTAS), but focusses on **the automation of inland distribution terminals -** at a cost that will **suit your operational budget.**
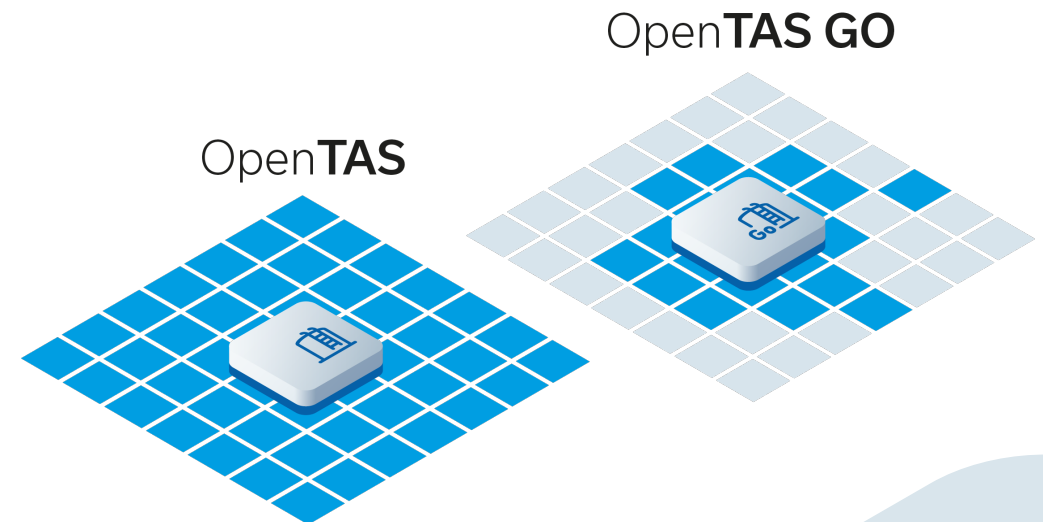

Open**TAS GO**

Open**TAS**

GO for an efficient solution to inefficient processes.

OpenTAS GO

allows you to manage your **entire terminal operations** in one system and gives you a **comprehensive overview** of your inventories and movements.

- All measurement data, bookings and stocks are available from a **centralized location** in the system.

- Based on this data, your tank terminal staff can take their **operational excellence** to a new level.

- At the same time, in-depth reporting functions enable you to make **meaningful decisions.**
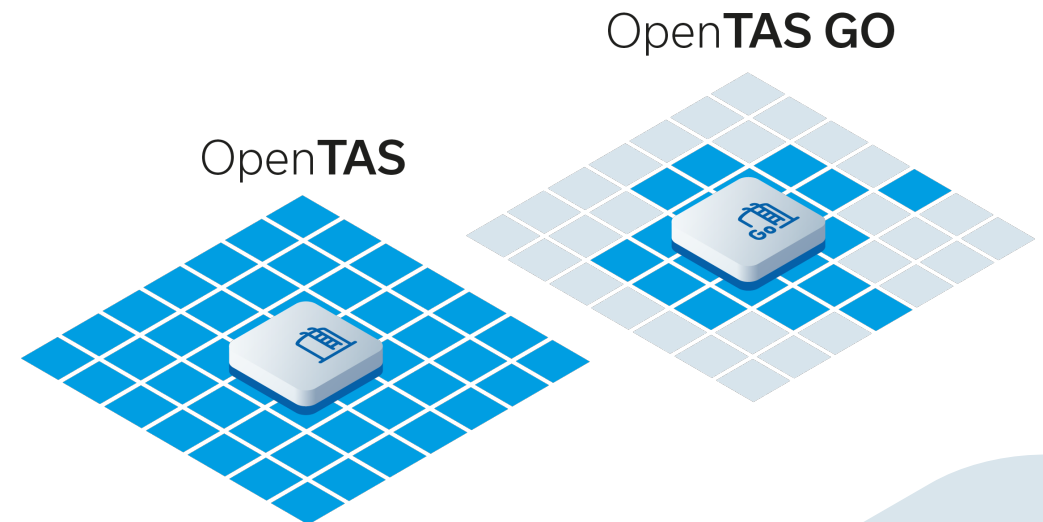

Open**TAS**

Open**TAS GO**

GO for an efficient solution to inefficient processes.

OpenTAS GO

enables driver-operated loading via **full process automation** from arrival to departure and can be **quickly implemented** without the need for complicated on-site IT activities.

- This means **low implementation costs** and a **quicker return on investment.**

- The solution is **highly scalable &**

- can be **seamlessly enhanced with AddONs** including after initial implementation.

Open**TAS GO**

Open**TAS**

GO for strong USPs:

Best practice

OpenTAS GO was developed based on 40 years of know-how and reconfigured according to Implico's industry best practices.

Vendor-independent

OpenTAS GO can be used with any type of in-the-field equipment. It can be integrated into all existing IT landscapes, because Implico supports all popular industry and vendor-specific protocols.

Future-ready

OpenTAS GO can be combined with Implicos UnitedDAT for tasks like machine learning, AI and data mining.

Safe & reliable

OpenTAS GO is based on decades of experience and guarantees secure business operations in accordance with legal requirements for stock transfers, transpor-tation and orderly accounting.

Available as managed service

OpenTAS GO is offered in a full-service option: This version requires no IT Infrastructure and zero IT management outlay.

GO for the best service on the market.

Implico offers application support and enhancement, business consulting and business services **from a single source.**

Our **product and process experts** at our Customer Support Center are ready to assist and will continue to guide you long after your go-live.
